Leadership is one of the values which define our ADN.
We share our sense of purpose

Sacyr was born in 1986. Since then, we have had good and hard times. We have always overcome them thanks to our people and values.

In 2015, our company is facing a new strategic view which will lead us to be stronger and more profitable in the half-long term.

One more time we rely on our human team in this new period. Sacyr is built everyday with your work and ideas.
In Sacyr, every project, no matter its size, complexity or singularity must contribute to improve citizens’ quality of life.

Our company provides its employees with personal and professional development opportunities.

Our company is able to produce value for our clients, associates and shareholders.

This is SACYR’s DNA.
Our future is already present:
We are an international, world leader group.

We are a company developing high-value projects and growing in a profitable and sustainable manner.

A business Project offering quality jobs and showing respect for the environment.

This is our common view,
Our investment in the future.
We share values
We are a team of thousands of people who add talent, rigor and passion for a well-done job. Cooperation, trust and loyalty make us stronger.

Creativity and innovation are part of every project we manage in Sacyr.

We make every idea unique. We are able to adapt to any situations.

We cooperate with trustworthiness, honesty and transparency.

Excellence is our mutual aim.
Operating principles

Internationalisation and sustainable positioning

Sacyr operates in more than twenty countries across the five continents working through all our subsidiaries.

We join synergies and create global teams.

There are no borders in Sacyr.

Scaling up in priority business

Sacyr strengthens its strategy to increase profitability by defining key segments of high operational performance.
Focal point
Selective local presence in a world without borders

In Sacyr we take a step forward on the way to internationalisation, we want to know the reality of the most important countries for our business. For this reason, local presence remains essential.
Planning and the awareness of meeting our needs and the needs of our business environment are key to sustainability.

Sacyr believes that the sustainability of our company is due to a sustainable finance, the elimination of corporate debt and payment to shareholders.
Our world is a very competitive ecosystem.

Sacyr aims at gaining international scale. Sacyr's presence in Latin America, Middle East, Portuguese-Speaking African countries and USA is seen as a priority.
Value generation and profitability

81% of our building projects are currently being developed out of Spain. We are leading the ranking of this sector thanks to the length of our construction order book. More than 35 months of activity are guaranteed.

Our internalisation model considers the importance of being established as a local. We take advantage of our ability to compete with leading companies of this sector in other countries and also our references and know how in specific segments.
Concessions, which are steadily growing, should persist in the support to Greenfield investments in social and transportation infrastructure in key markets. Sacyr continues its strategy of rotating mature assets along with the consolidation of local structures.
Sacyr Industrial

Industrial business is rising. Our growth will allow us to implement and export our references and knowledge with regard to the energy sector to any countries. We want to develop all kind of EPC projects involving electricity generation, oil and gas and power plants.

Valoriza Agua

The services regarding the integrated water circle management are also a key point to export our technology across all five continents. We are leading specific segments concerning water treatment, desalination and purification. Our implementations should expand to Middle East, Latin America and United States.
Valoriza Servicios Medioambientales

Environmental business needs a local establishment to expand quickly in other countries. We can provide know how in services and projects which need experience and treatment technology.

Valoriza Facilities

Multiservices’ next steps will be focused on the integration of capacities from several business sectors (Conservación de Infraestructuras, Facilities) and the implementation in sectors where Sacyr Group already works.
