

PRESS RELEASE**SACYR AND GCZ WILL BUILD TWO HYDROELECTRIC POWER PLANTS IN PERU FOR 102 MILLION EUROS**

- **The works correspond to the Moquegua 1 and 3 plants and will have a construction period of 30 months.**

Lima, July 19, 2019. The consortium, formed by Sacyr and GCZ Ingenieros, will be responsible for the construction and installation of the Moquegua 1 and 3 Hydroelectric Power Plants for 102 million euros, after winning the tender put out by the Electric Power Company of the South (Egesur). The two plants will have an installed capacity of 34 megawatts (MW).

The project will last approximately 30 months.

"We have proven experience in the construction and commissioning of highly complex energy infrastructures in Peru. We are proud to continue contributing to improve energy generation services in the country, for the benefit of citizens," said **Carlos Martínez-Almeida**, representative of the consortium.

The project of the **Moquegua 1 Hydroelectric Power Plant (CHM1)**, of 15.3 MW of power, includes, among other infrastructures, the connection work with the current Huaracane channel, a conduit of 8,360 m, three tunnels totaling 1,800 m in length, the engine house, the electric substation and the transport line.

The project of the **Moquegua 3 Hydroelectric Power Plant (CHM3)** of 18.7 MW of power, includes, among other infrastructures, a water intake on the Sajena creek, a conduit of 7,211 m, a tunnel of 2,660 m, a machine room and unloading works to the Sajena ravine. In addition, an electrical substation and a transport line will be also built.

Sacyr in Peru

Sacyr has been operating in the Peruvian market since 2011 with its four business areas: Industrial, Engineering and Infrastructure, Concessions and Services, which strongly contribute to the economic development of the country and the quality of life of its inhabitants.

Sacyr currently has over 3,000 employees in Peru, where it brings value and experience in the 20 contracts which are completed or under development.
