

**PRESS RELEASE**

**SACYR WILL BUILD THE LOS AREJOS - NÍJAR (ALMERÍA) HIGH  
SPEED RAILWAY SECTION  
FOR 118 MILLION EUROS**

- **The section includes 10 viaducts, of which three are more than 900 meters in length.**

**Madrid, April 1, 2019.** Adif Alta Velocidad has awarded Sacyr Engineering and Infrastructures the construction of **the Los Arejos - Níjar (Almería) section**, within the Murcia - Almería High Speed Mediterranean Corridor. The contract has **a value of 118.5 million euros** and an execution period of 32 months.

The 17.7-kilometer route has 9.2 km in double track (14 m platform) and another 8.5 km in single track (8.5 m platform).

The main actions to be carried out in the section are:

- 10 viaducts, of which three are of large dimensions (more than 900 m in length)
- 5 overpasses on roads or paths
- 11 underpasses
- a protection wall.

The project also includes earthworks (demolitions, clearings, embankments, prepared subgrades and sub-ballasts); the longitudinal and transversal drainage of the platform; and the replacement of electrical, telephony and easements services.
