SACYR IS AWARDED THE URBANIZATION WORKS IN SOUTH AL MESHAF (QATAR) FOR 114 MILLION EUROS

- **The company carries out the urbanization of 117 hectares in the south of Doha and the construction of a waste collector with a micro tunnel (TBM) of 6.5 kilometers in length**

Doha (Qatar), 17th May 2019 .- The Qatar State Company Asghal has awarded the consortium formed by Sacyr Engineering and Infrastructure and Medgulf the urbanization works in South Al Meshaf (Qatar) in the south of Doha for a total of 114 million euros.

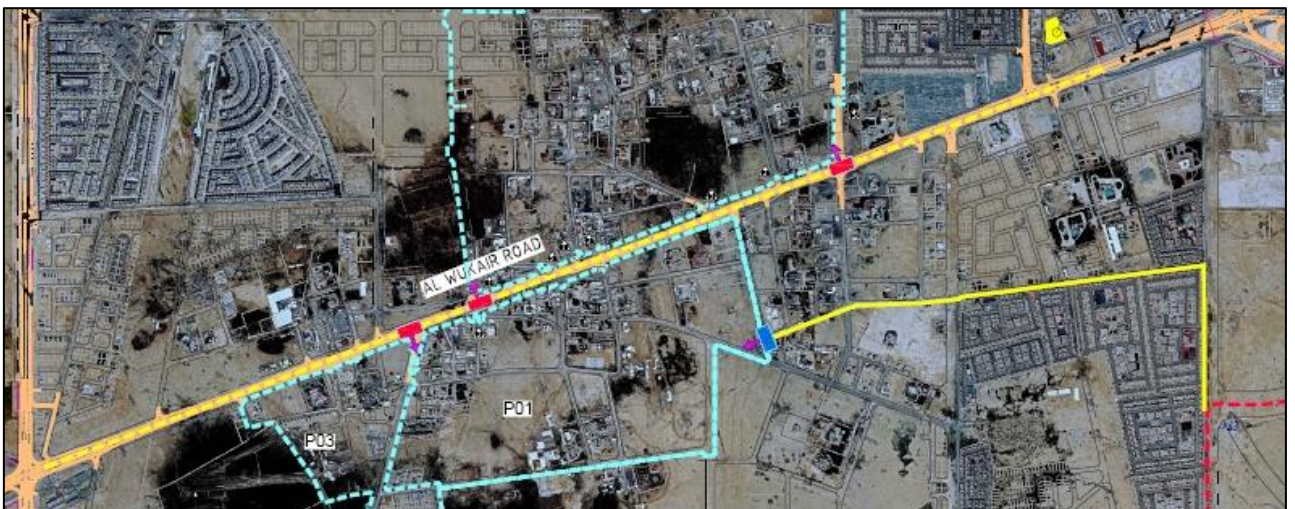

The project will consist of the urbanization of the surrounding area of 117 hectares located in the south of Doha, 5 kilometers west of Al Wakrah (Qatar), which will include 9.5 kilometers of roads and a waste collector by building a 6.5-kilometer-long micro tunnel, with a diameter of 2 and 2.4 meters located at a depth of 25 and 38 meters.

The works will commence next June and will have a duration of 42 months.

Sacyr already has other projects underway in the country, such as the design and construction of the building works of QEZ-1, as well as the sewerage of plots A and B in the same area, among others.

This project South Al Meshaf is yet another example of the company's consolidation and commitment in this strategic market.
