PRESS RELEASE

SACYR WATER MANAGES FOUR WATER TREATMENT O&M CONTRACTS IN NAVARRA

- **The water management network supplies 17 municipalities with over 450 bio and physical treatment facilities.**

Pamplona, December 22, 2022.- From December 1, Sacyr Water manages the operation and maintenance of the transport and wastewater treatment facilities of the Zona Media de Navarra. Thus, it oversees four contracts in the Comunidad Foral, as well as a drinking water treatment station.

This new area includes 96 facilities for a 36,000 population. Thus, Sacyr Water supplies 17 municipalities in Navarra, with 142 wastewater bio treatment facilities for and 315 physical treatment facilities, supplying +125,000 people in Navarra.

Sacyr Water takes an integrated water cycle management approach at its treatment plants before releasing it back into nature. Treatment plants designed, built or operated by Sacyr Water in cities such as Madrid, Puertollano (Ciudad Real) or Murcia can efficiently treat up to 890,000 m³ of water per day.

Sacyr Water

Sacyr Water is responsible for the integrated water cycle management, operation, and maintenance of +13,000 km of water supply networks and 180,000 sewage drain systems in six countries, supplying 10 million inhabitants.

In 2018, Sacyr Water set up a virtual office app for easy access from any location. This app presents many functionalities, including having access to bills in a quick, easy and sustainable way, sending your water meter reading online, reporting incidents and creating bill simulations
