## PRESS RELEASE

# SACYR CONCESIONES BEGINS OPERATION OF RUTA 78 (CHILE)

- **The P3 company will invest US\$ 892 million in improvements for this highway in the coming years.**

**Santiago de Chile, March 23, 2022.-** Yesterday, Sacyr Concesiones **started the operation** of the Santiago - San Antonio (Ruta 78) highway in Chile. This infrastructure was officially awarded to Sacyr Concesiones earlier this month by the Chilean Ministry of Public Works.

The project includes an **investment of US\$ 892 million (€ 810 million)** for a maximum variable term of 32 years. The development involves extending the highway by 132.8 km and will benefit approximately 1.7 million people per year. This road is a fundamental axis for cargo transportation between Santiago and the Port of San Antonio and for the urban areas in the vicinity of its route.

This project affects **several sections of the highway, the widening of traffic circles, the construction of new ramps to the ports**, the full renovation of the Manuel Rodriguez Bridge and new junctions, all with the aim of enhancing safety and reducing travel times.

### **Sacyr in Chile**

Sacyr has invested close to \$US 6.5 billion in Chile in various projects through its three lines of business, including the construction, operation and management of 2 airports and 14 P3 road projects, totaling more than 1,700 km of highways.

In hospital infrastructure, it has been awarded 7 hospitals, totaling more than 2,600 beds and approximately 600,000 m<sup>2</sup>. These include the Antofagasta and Buin-Paine hospitals (in a P3), Alto Hospicio, Biprovincial Quillota-Petorca, Villarrica, Sótero del Río and Cordillera.
