SACYR AWARDED OWNER ENGINEER SERVICES FOR A LNG STORAGE TANK IN THE PORT OF ROTTERDAM

- **This expansion will provide an additional regasification capacity of 4 bcm per year.**

Madrid, October 6, 2023.- Sacyr Engineering and Infrastructures, through its engineering subsidiary, **Sacyr Proyecta**, was selected by Gate Terminal B.V. to deliver the **owner engineering services** for the fourth LNG storage tank in the Port of Rotterdam terminal (Netherlands).

This contract is part of Gate Terminal's (a JV of Dutch gas operators Vopak and Gasunie) expansion plan of its **Gate Terminal at the Port of Rotterdam**, with a 4th LNG storage tank of 180,000 cubic meters and an additional regasification capacity of 4 bcm (thousand million cubic meters) per year.

"This contract reflects the trust the Client has put into Sacyr Proyecta, especially after our past successful collaborations with Gate Terminal in other projects. We're thrilled to contribute to the expansion of the Gate Terminal and its important role in the security of supply of energy in the Netherlands and its neighboring countries", says **Juan Antonio Marín Ródenas**, General Manager at Sacyr Proyecta.

The project includes a new LNG storage tank of **180,000 cubic meters**, and an additional regasification capacity of **4 bcm per year**. Part of the works included in the project will be managed from Spain, and the rest on site, by Sacyr Proyecta expatriates and local partners.

"One of the biggest challenges we'll be facing in this project will be ensuring a safe execution of the site activities while supporting Gate in managing interfaces between

multiple contractors and various stakeholders and meeting strict deadlines”, says **Sergio Puerto**, Project Manager with Sacyr Proyecta.

About Sacyr Proyecta

Sacyr Proyecta has over 300 professionals specializing in energy projects, with a focus on the oil and gas, energy, chemicals and petrochemicals, industrial facilities, LNG, and renewable hydrogen projects.

Successful projects developed by Sacyr Proyecta include the LNG Break Bulk Terminal Project for Gate Terminal, the expansion of the Oporto refinery and a LNG terminal in Malaysia, a gas compression facility, or the construction of an unloading and storage facility, both in Peru.

Back in April, Sacyr Proyecta was awarded the owner engineering services at the new LNG terminal in Stade (Germany).

Currently, Sacyr Proyecta develops projects such as a gas compression facility in Egypt for GASCO; an ultra-high density polyethylene facility for Repsol in Puertollano, Spain; an advanced biofuel facility for Repsol in Cartagena, Spain; or the commissioning of a LNG facility in El Musel (Gijón, Spain) for Enagás, and is also a frequent collaborator in projects by DuPont Ibérica, Alcoa and Química del Nalón, among others like the new Gate Project of the 4th LNG storage tank.
